PROFESSIONAL EXPERIENCE

Founder and CEO

CreoCloud LLC.   📅 2016 - Ongoing   📍 Wollerau, Switzerland

- Autodidactic training platform for technology professionals & enterprises, offering freemium training libraries in e-book, video, and audio formats.
- I founded and operate 6 Switzerland-based services in online education space including www.scrum-institute.org, www.sixsigma-institute.org, www.test-institute.org, www.io4pm.org, www.mba-institute.org and www.devops-certification.org.
- With these services I rebuilt the student experience and enhanced added value per unit cost in some old fashioned education business models which were anyway doomed to be disrupted since long time. I serve an exponentially scaling worldwide student base by providing them at least 10 times better service than my closest competition. And every single day I continue making progress to serve them better.
- I built CreoCloud™ Computing Cloud Platform to enable customers to launch and use high performance and secure computing cloud servers. CreoCloud™ is the first and only computing cloud provider which offers: (1) All Inclusive Hourly Flat Rates, (2) Industry's Highest 99.99% Uptime SLA. This platform can be deployed as private, public or hybrid cloud infrastructure.
- I built IPSeek.io which is World's Most Popular Enterprise Grade GeoLocation API with "Buy Once. Make Unlimited API Calls, Forever." business model. A London/Vienna based investment/technology company has acquired this product from my company, CreoCloud LLC.

Senior Manager, Founder and Leader of Digital Technology Delivery in CH/DE/AT Region

Accenture AG   📅 2011 - 2016   📍 Zurich City, Switzerland

- I founded and led Accenture's Digital Technology Delivery Workforce in Switzerland, Germany and Austria from zero to 200+ employees which yearly generated EUR 30M+ for the company.
- I re-founded and led Technology Solutions Advisory Board for Accenture Switzerland.
- I led very complex hands-on deliveries of Mobile Network Operator, CRM, Billing, Online Sales and Online Self-Service Projects for a major Pan-European Telecommunications Operator in Switzerland.
- I had overall project accountability and Accenture ownership for our client sponsors. I was responsible for daily status reporting to stakeholders (from Mid-Management to CEO). I was the only Accenture member of Client Vice President's Program Steering Committee.

Lead Test

International Institute for the Safety of Medicines

📅 2010 - 2010   📍 Basel City, Switzerland

- I was responsible for the validation of semantics interoperability based pharmacovigilance solutions and directly reported to CTO.
- I built, strategized and managed a group of test design and test automation engineers, setup testing processes and standardized test design, automation and execution equipments and environments.
- I built internal quality assurance processes and I have customized them to comply with ISO 9001 2008, CMMI Level 4 (Quantitatively Managed), Computerized System Validation (CSV) of US Food and Drug Administration (FDA).

PERSONAL INFO

📅 **Date of Birth**
1979

🌐 **Citizenship**
Switzerland

HOW CAN I SERVE YOU?

As your partner or contributor, I pursue software projects in business and non-profit with exponential growth potentials.

When I am inspired by a massive transformative purpose, I invest my time to test and enhance it.

My primary motive to take action is my curiosity for the unknown, the excitement to defy status-quo and to serve you and your customers with software.

Feel free to connect and drop a note if you feel like to discuss.

MOST PROUD OF

🖥 **I build software**
Not only because it is the most underestimated art, science and craftsmanship of our time. But also I love to help people with it. To serve masses with its tangible benefits ignited from invisible ideas. To accomplish goals which may have once seemed to be overly complex.

📊 **I build businesses with software**
Software is changing the world we share together. I figured out there are and there must be many other ways to improve lives with the purity and essentialism built in software combined with the simplicity in business design.

🎛 **I do what is takes to get it done**
We're what we repeatedly do. For lifetime learners like myself who believe in lifetime productivity, success is not a single act, but it's an inevitable result of our ongoing habits, ambitions and self-motivation.

Head of Test Engineering

724 Solutions Int. Inc. 📅 2007 - 2009 📍 Lenzburg, Switzerland

- I was responsible for the software testing and quality assurance of intelligent any-to-any service message and traffic handling solutions built upon a common carrier-grade architecture that allows mobile network operators and virtual network operators to rapidly deploy flexible and open next generation IP-based network and data services. I was in charge of quality during complete development and on-site production life cycles starting from scoping of the project requirements to the end of support.
- The products that I was responsible for their overall quality assurance and testing efforts have been running in the production environments of the 7 of top 10 global GSM operators.
- I developed and renovated quality assurance & testing processes, managed testing projects, managed, planned and monitored a pool of 10+ senior and junior level test engineers & test team leads.
- I managed, planned and monitored 15+ off-site resources located in Mumbai, India in order to decrease the labor expenses of the organization.
- I created and promoted ISO9001 & CMMI Certification strategies of the organization. I led official audits for these standards.

Senior Solution Architect, Development Lead
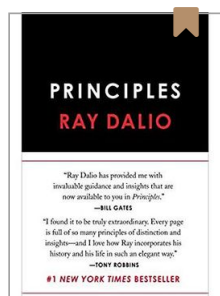

Accenture LLC 📅 2005 - 2006

- I designed and implemented Service Orchestration (SO) and associated business processes for a major Service Delivery Platform.
- I was responsible for functional and technical design of all the Service Delivery Platform Core components and interfaces.
- I supported my client for the overall program management containing 8 partner companies and over 200 project engineers.
- I acted as Design Lead of Service Orchestration (SO) Architecture. This role involved requirement collection from the client and other partner companies in a technically and politically complex environment in order to apply best practice solutions in Service Oriented Architecture.

## Lead Software Designer, Development Architect

Alcatel Inc. 📅 2003 - 2004

- I was in charge of managing design and development of customized solutions for my clients. My main focuses were: VoIP based integration and transformation solutions such as interoperability between PSTN, SIP and H.323 networks, Broadband Gateway Management Solutions for QoS.
- Some of the propositions I deployed to the major operators around the globe were: Soft-Switch, Session Resource Broker (SRB) for DSL Networks, Access Border Gate for VOIP Networks, Service Management Center.
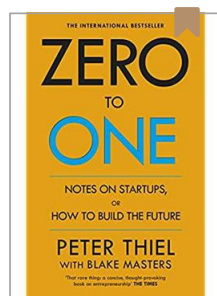

BOOKS I OFTEN RECOMMEND

**Principles
Life and Work**
Ray Dalio

**Information
Rules: Network
Economy**
C. Shapiro, H. Varian

**Zero to One,
Notes on Startups**
Peter Thiel, B. Masters

MSc. Computer Engineering

Yildiz Technical University

📅 2003 - 2006   GPA **3.59** / 4.0

- I graduated as 2nd student of the department.
- My Thesis: A Video-Based Real-Time Face Recognition System (MS Visual C++)

BSc. Control and Computer Engineering

ITU Technical University

📅 1997 - 2002   GPA **3.21** / 4.0

- I graduated as 4th student with focus on Software.

AWARDS

🏆 **Siemens Excellence Award 2002**
With my BSc. Thesis (A Multipurpose Server-Client System) I was humbled with this award among 80 other students.

👑 **Accenture's Highest Performer Manager of Year 2013**
In Accenture I was internally awarded and compensated after I became the highest performer manager in 2013 among more than 130 other managers in ASG region.
